Wildwood Park is a residential development unique to Winnipeg and Western Canada. Houses and parks are integrated so that motorized vehicles provide a secondary role to pedestrians.

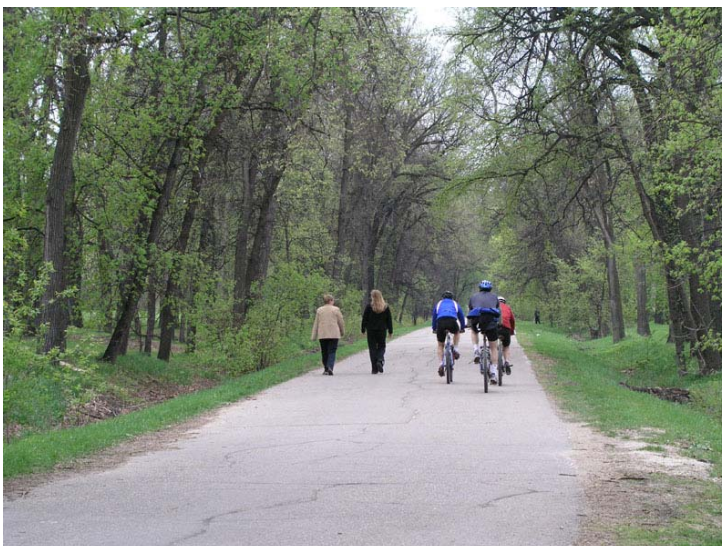

Developed in 1948, the central trail and multiple parks offer pedestrians many varied walking routes. There are three playground structures integrated into the parks allowing children a safe area to play. Immediately surrounding the Wildwood Park residential development is the Wildwood Golf course. The golf course is surrounded by dikes on either side which offer excellent walking paths. Dividing the golf course is a quiet one way street which offers specular views in all seasons.

Trail Features

- Parking:** Park along any side street to access the Park. Wildwood St. and Manchester Blvd N. and S. is an excellent place to start.
- Distance:** ~5 km through the residential park, along the dikes surrounding the golf course and through the golf course.
- Surface Type:** City sidewalks through the residential park, trails on the dikes and asphalt quiet street through the Wildwood golf course.
- Suitable For:** Walking, cycling
- Seasons:** Open year around.
- Amenities:** Benches and play structures throughout the residential park.

Wildwood Golf Course

The quiet one way city road which divides the golf course is one of the most scenic walks in Winnipeg. Massive elm trees shade the route providing a habitat for many different species of birds.

Spring, summer, winter and fall this area is a natural showcase. The dikes on either side of the golf course also provide an excellent natural area for walking and home to extensive wildlife.
